PROFILE

Passionate and results-driven IT student seeking a Full-Stack Developer position. Highly skilled in building responsive web applications and designing user-friendly interfaces using modern frameworks like Next.js and Express.js. A fast learner with strong problem-solving skills, dedicated to developing robust, end-to-end features.

EDUCATION

Bachelor of Science in Information Technology

Pambayang Dalubhasaan ng Marilao

June 2022 - May 2026

WORK EXPERIENCE

Software Engineer Intern (January 2026 - April 2026)

Paidesk Services OPC

- Developed an internal translator tool that processes uploaded JSON files for multi-language translation using Gemini AI and stores results in AWS S3, reducing translation time by 40% compared to previous workflows.
- Engineered a comprehensive Employee Management system using Next.js and PHP Laravel, implementing Sanctum for secure authentication and role-based authorization to establish a robust development framework for 3 next interns.
- Actively participated in Agile/Scrum ceremonies to communicate development progress, outline upcoming deliverables, and resolve technical blockers.

SKILL

- Frontend : Next.js, Redux, TailwindCSS, Shadcn/ui, SCSS (SASS)
- Backend : Node.js, Express.js, PostgreSQL, Supabase
- Tools : Git, GitHub, Figma, Postman, Neovim, Cursor, Antigravity

PROJECTS

Fetchfolio (April 2026 - June 2026)

- Developed a headless CMS to manage website portfolio content (projects, skills, and awards) using Next.js, Express.js, PostgreSQL, Drizzle ORM, and Neon DB, enabling seamless data updates without requiring manual codebase modifications.
- Implemented NextAuth.js for authentication, React Query with Axios.js for data fetching and API keys to get stored information.

AnatoLearn (June 2025 - November 2025)

- Developed an Augmented Reality (AR) application using Unity and C# that tracks and maps human body movements onto a 3D model, enhancing interactive science education for four sections of 6th-grade students.
- Implemented gamified quizzes, a reward badge system, and digital certificates to drive student engagement and provide structured learning assessments.

Kape Ibarra POS & Inventory (June 2025 - November 2025)

- Developed an inventory and POS system with user roles (cashier, admin) using Next.js, Express.js, PostgreSQL, Prisma ORM, and Supabase helping Kape Ibarra's Coffee shop to easily manage order, track sales and stocks.
- Implemented JWT for secure user authentication, alongside core system features including product management, stock tracking, and transaction logs.
