Frontend
Backend

PROFILE

Passionate and results-driven IT student seeking a Fullstack Developer position. Skilled in modern frameworks including Next.js, and Express.js. Building responsive web applications, designing user-friendly interfaces, and developing full-stack features using modern JavaScript frameworks. Fast learner with strong problem-solving skills.

EXPERIENCE

Software Engineering Intern **JAN 2026 - APR 2026**

Paidesk Services OPC

Tech: Next.js, TailwindCSS, ShadcnUI, PHP Laravel, AWS S3

- Built an AI translator that translates uploaded JSON file into different languages and store in AWS S3 as an internal tool of the company
- Implemented features of Employee Management using Next.js and PHP Laravel with Sanctum authentication and built in authorization

PROJECTS

Fetchfolio **APR 2026 - JUN 2026**

Tech: Next.js, TailwindCSS, Shadcn UI, Express.js, PostgreSQL, Drizzle, Neon DB

- Headless CMS where you can store your portfolio information such as projects, skills, and awards or certificates
- Uses next-auth for authentication, React-query with Axios for data fetching and API keys to get stored information

AnatoLearn **JUN 2025 - NOV 2025**

Tech: Unity, Express.js, PostgreSQL, Supabase

- Built an AR to detect human body and mimic it's movements in 3D model using Unity's C#
- Implemented gamified quiz, badge system, certificate, and user login

Kape Ibarra POS & Inventory **OCT 2024 - DEC 2024**

Tech: Next.js, Shadcn UI, TailwindCSS, Express.js, PostgreSQL, Prisma, Supabase

- Built an inventory and POS system with user roles (cashier, admin)
- Used JWT for user authentication and authorization
- Implemented product management, stock tracking, and transaction logs
